

Bat Walk

On Tuesday night we went on a bat walk. We walked through a forest and ended up at a lake. We left the building just after nine because bats only really come out at dusk. We used a bat detector to hear the bats more easily but it was really complicated because we had to turn the knob to the right frequency. We saw three types of bats. We saw some Common Pipistrelles, some Noctules and some Soprano Pipistrelles. Then we went back to the hall and had some hot chocolate and biscuits before bed.
